Wattleseed Icecream Recipe

Ingredients:

- 1 litre of premium vanilla ice-cream
- 2 teaspoons of Wattleseed

This recipe is a very easy way to make good quality vanilla ice-cream into a bushfood sensation that every-one will rave about. Simply add the Wattleseed into a glass and add just enough boiling water to cover the grounds. Don't add more water or it will form ice crystals when refrozen

Allow to cool

Allow ice cream to partially thaw, put in large mixing bowl and add the cooled wattleseed grounds, mix well, put back in ice cream tub and refreeze.

Enjoy your delicious wattleseed ice cream with its hazelnut, coffee and chocolate flavour and aroma!
